SUMMARY

Full-stack software engineer and Computer Science student (graduating December 2026) who builds and ships production web applications end-to-end. Comfortable across the stack with C#/.NET, Python, JavaScript, and SQL — from Blazor and Django front ends to REST services, relational data modeling, and AWS deployment. AWS-certified, with a track record of taking projects from requirements through live deployment.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, SQL
Frontend: Blazor, JavaScript, HTML, CSS
Backend & APIs: ASP.NET Core, Django, REST services, boto3
Databases: PostgreSQL, DynamoDB, SQL
Cloud & DevOps: AWS (Lambda, EC2, S3, DynamoDB, SAM), Docker, Nginx, Git, Linux/WSL2
Concepts: Role-based access control (RBAC), domain-driven design, event-driven architecture, serverless

PROJECTS

- ClinicScheduler** | ASP.NET Core · Blazor · PostgreSQL
- Built a full-stack clinic scheduling application with role-based access control (RBAC) enforcing distinct permissions for patient and staff users.
 - Designed patient and appointment management modules using domain-driven data modeling for clean, maintainable business logic.
 - Deployed the application as a live web service on AWS EC2 behind an Nginx reverse proxy.
 - Explored HL7 FHIR integration concepts for healthcare data interoperability.
- Patient Onboarding System** | Django · AWS Lambda · DynamoDB · Amazon Rekognition
- Owned end-to-end development of a serverless identity-verification pipeline, from requirements through deployment.
 - Designed an event-driven backend on AWS Lambda and DynamoDB for scalable, cost-efficient operation.
 - Built a Django front end for patient intake and integrated AWS services via boto3.
- Network Intrusion Detection System** | Python · PyTorch · NSL-KDD
- Benchmarked classical ML (PCA + SVM) against a deep-learning MLP for intrusion detection on the NSL-KDD dataset.
 - Implemented backpropagation and an MLP training loop from scratch with matplotlib visualizations.

EDUCATION

Texas A&M University—RELLIS · Marlin, TX *Expected December 2026*
B.S. in Computer Science
Relevant Coursework: AI-Enhanced Security, Computer Networking (CCNA-level).

CERTIFICATIONS

AWS Certified Cloud Practitioner	Completed
AWS Certified AI Practitioner	Completed
IBM Qiskit Advocate	Active
AWS Cloud Application Developer - AWS Cloud Institute	Completed

EXPERIENCE

- Operations Staff** · Treece Services *Aug 2021 – Present · Part-time*
- Coordinate staff schedules and manage day-to-day operational logistics across service events.
 - Oversee scheduling and logistics planning to deliver services on time and in an organized manner.
